ONLINE CURRICULUM

Time4Learning

Gr. K-5

Time4Learning is a new approach that takes advantage of today's technology. It's a convenient, online home education program that combines learning with fun educational teaching games.

Time4Learning helps parents build interesting diverse days. By shifting from computer-based lessons to discussion, or from paper and pencil exercises to art projects, children stay engaged and benefit from different teaching methods. Variety keeps children motivated and attentive throughout the day. Time4Learning's online learning system combines in one homeschool curriculum interactive lessons, multimedia reinforcement activities, printable worksheets, learning games, and assessments with reports.

Subjects Covered: Language Arts and Math; Social Studies and Science will need to be ordered separately

Format: Online program – requires Internet access

Learning Style: multi-sensory

Teaching Style: structured, low prep, moderate interaction required; basic computer skills required

The Ordinary Parent's Guide to Teaching Reading Combo Pack

Gr. K-1

Learning to read is often thought of as a mystical process that requires a trained professional. Remember: patient, frequent, and consistent is the key. Take as long as you really need to, but faithfully move your way through "A is the first vowel we will say," to the fourteen syllable supercalifragilisticexpialidocious. Using the explicit phonics method (rather than sight-word or basal reading systems), the lessons begin with short vowel sounds, and then move through consonants, blends, long-vowels, silent letters, r-changed vowels, two- and three-syllable words, possessive words and contractions, and more.

Each lesson is organized with notes to the teacher, scripted lesson content for the teacher to give to the student, and words for the child to repeat after the teacher or read to himself. There are no pictures on the pages, and this keeps students from being distracted or from becoming dependent upon pictures for guessing. Guessing is not the goal; memorization is.

The program also comes with magnet boards and letters and an audio companion.

How to Make Books with Children

Gr. K-2

Beginning Writers

Holidays and Celebrations

Literature and Writing Connections

Read a Book—Make a Book

Science and Math

How to Make Books with Children Series just got better, with the addition of *Beginning Writers*, specially developed for grades K-2. Each of the 22 topics in this handy resource starts with: prewriting suggestions, a list of current literature to read, oral language experiences that build vocabulary, and background for writing.

Your children can then create the type of book that suits their individual writing levels.

Top off each student's story with a charming, reproducible cover. Using the same forms, you can make group books, too. Each topic has two group-book ideas and clip art to enhance the books. There are several books to choose from and you may choose one and later switch to another!

Writing Strands

Gr. 1-5

Level 2 (Ages 7-9)

Level 3 (Ages 10 and up)

Writing Strands presents exercises that were written so that everything the students need to know to do the work is in the assignments. Most students take one year to complete a level. The instructions in each assignment in each level include identifying the skill being presented; suggesting the number of days (sessions) the average student should need to do the work; listing objectives of the exercise, so you will know what parts of the skill will be learned; presenting a model, so that the child will understand what the work will be like; giving pre-writing exercises—the child is asked to examine things or is encouraged to talk about, or read about the subject before writing; presenting clear and detailed instructions for the writing.

Explore and discover science concepts and processes through inquiry and hands-on learning. Fun, meaningful activities for student-directed individual or small-group learning. Each Nutshell includes 8-12 activities that develop a specific science topic, with an activity guide that has simple, clearly written instructions, and an activity journal in which students may record observations and data. Materials for lab experiments are included, except for common household materials. Strands cover Earth, Physical, Life, and Human body topics.

Format: kit with consumable and non-consumable pieces, activity guide, and activity journal; may also order *Sciencesaurus* for content support

Learning Style: multi-sensory; interactive

Teaching Style: structured, low prep, moderate to high interaction required

Young Scientist's Club

Gr. K-2

The Young Scientists Club works similar to a magazine subscription in that your child will be sent a complete science kit on a regular basis. Each kit reinforces what was learned in previous kits as well as introduces what will be learned in future kits, creating a continuous curriculum of science learning. Each kit contains several science experiments and takes, on average, one hour to two hours to complete (with some long-term projects such as growing bacteria and measuring rainfall). The kits cover topics ranging from batteries and fossils to the human body and volcanoes. In each kit you receive all the materials needed for the experiments except for common recyclable and household products (i.e., plastic bottles, jars, baking soda, vinegar, etc.).

Format: consumable kits which are received one at a time; some materials from a kit may be also needed for the next kit in the series so don't throw them away!
